

Teanchai Singkhamkoon

Software Developer

Summary

I am a software developer with 2 years of experience in UI & UX, Front-End and Back-End. I have worked on integrated for clients such as AFS Intercultural Programs and GPS Tracking during my career.

Until recently, I worked for M.B. System Automation Co.Ltd., as a full stack developer worked with foreigner user focused on many new tools for the software industry. In this role, I was focused on a responsive web application, UI & UX, 3-Tier application architecture and system analyst.

My colleagues know me as a responsible developer and I often make communication with team. These things are very challenging for me and I enjoy all aspects of my job.
